
PROJECT 2:

Travel Planner

DEISE KOREEDA

Travel Planner: The idea is ...

- Plan your trip
 - **Choose a city**
 - **Search** for a specific **activity**
 - **Save/edit** places on your **wishlist**
-

Project management

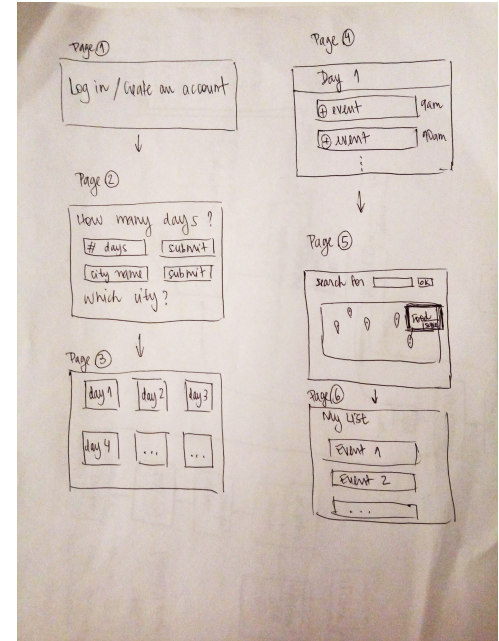

Wednesday

- Pick a topic
 - Home Brewing
 - Healthcare
 - Travel
- Empathize with user's needs
 - Me as a user
- Search APIs: traveling, tourist attractions, restaurants, etc
 - Yelp + Google Maps

Thursday - Yelp API made me feel useless

Friday

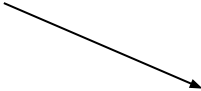

- Change API: Eventful + Google Maps
- Look at retrieved data and ----->

Constraints

1. 2 projects at the same time
2. Time management

Deltas

1. Simplify - what is feasible
2. Time management
3. Study bcrypt and cookie

Wins

1. Back end is not as intimidating as I thought
 2. Work with Google Maps API is fun
 3. Helped few people to figure out their bugs
-

Thank you!
